

The luminaire housing is formed from extruded aluminium with a powder coated finish. Ingress protection is rated to IP65 throughout the range, and the diffuser is opal polycarbonate with a nominal transmission of eighty two percent measured at the centre of the emitting surface.

Control gear is supplied loose or integral depending on the variant ordered. DALI-2 dimming is available across every output, and emergency versions carry a three hour battery tested to the relevant standard for self contained luminaires used in commercial installations.
